Change-Pro® for Excel

OVERVIEW

The patent-pending Change-Pro for Excel is a powerful and indispensable tool for all professionals engaged in the management and comprehension of Excel data. Compare Excel files with one or multiple sheets — view all aspects of your documents, including value and formula changes, in an intuitive format in a side-by-side view, while maintaining all layout aspects of the original document.

PRODUCT FEATURES

- **Accuracy:** Change-Pro for Excel shows a high level of accuracy in detecting changes in MS Excel spreadsheets.
- **Compare Value and Formula Changes,** including changes to formulas that didn't result in changes in values, along with formulas auto-adjusted by Excel due to additions or deletions of rows, columns or cells.
- **The Easy Navigation Pane** allows you to select any or all changes to scroll to the particular change or use numbered changes as reference points in discussions.
- **Create, Import and Edit Macros** in Change-Pro for Excel to pre-process worksheets to reconcile data from different worksheets.
- **Multiple Viewing Options** including three synchronized windows for the original, modified and redlined document.
- **Format & Rendering Options** allow you to select how changes are shown. For example, you can choose to use cell highlighting or a text color change to depict a deletion or addition.
- **Convert** any Microsoft Excel spreadsheet (including the redlined version) to a PDF file with ease.

INTEGRATION

Email integration with Outlook | Integration with Microsoft Excel and Outlook to launch comparisons of attachments or open spreadsheets | Full integration with all major document management systems
