Rethink PDF. Think LDF.

BENEFIT

Reduce editing time and manage security of PDF documents.

OVERVIEW

The problem with editing PDF documents has always been formatting. When a user wants to add or delete text, they want it to wrap around like a word processor.

Whether it be inserting or appending pages, Bates numbering or redacting, the process of PDF editing needs to be intuitive and easy to use. Litéra understands the needs of users and has developed LDF specifically for their needs.

PRODUCT FEATURES

PDF EDITOR

- Reflow: Add additional text and reflow the entire document*.
- Add, delete or modify text.
- Fill and save forms in an easy-to-use interface.
- Append to create binders, rearrange pages.
- Insert, import, modify and delete pages.
- Copy and paste into an editable PDF document.
- Add notes, pictures and signatures.
- Find and replace with content reflow*.
- Add Bates numbering.
- Split or separate multi-page PDF files into smaller, individual files.
- Eliminate underlying text for secure redaction.
- Create bookmarks and TOCs.

PDF EXTRACTOR

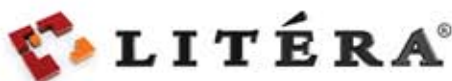

- Convert PDF to Word with the optional Litéra OCR Server (powered by ABBYY).
- Convert PDF to TIFF or JPG files.

PDF COMPARISON

- Compare PDF document versions in their native format or use the optional Litéra OCR Server (powered by ABBYY) to compare scanned PDF documents.

PDF PRINTING & SECURITY

- Create high-quality, strong compression and secure PDF documents from any application that allows printing.
- Limit users from printing, copying or pasting text and graphics.
- Restrict the addition or removal of pages and commenting.
- Customize security measures that can be centralized throughout your organization.
- Batch metadata tools enable complete control of privacy and security.
