

CitationWare®

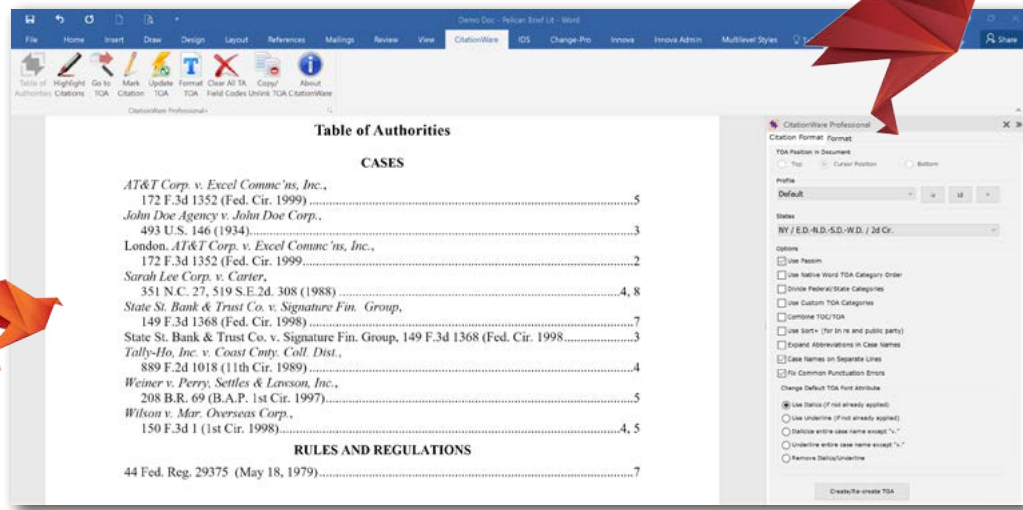

Table of Authorities Simplified

CitationWare® is a patented add-in for Microsoft® Word that generates impeccable Table of Authorities for legal briefs. CitationWare® offers a simple, efficient interface in Word and produces documents with trial-ready precision while eliminating hours of manually editing citations which reduces inaccuracies.

- Microsoft® Word **add-in**
- Generate **Table of Authorities** for legal briefs for all **50 states**
- **Specialty court** options
- **Reduce inaccuracies**

"Knowing this product [CitationWare®] is in the hands of Litéra gives us great comfort. As a small aside, your team has been absolutely fantastic in helping us resolve issues relating to Change-Pro® for our Windows 7/Office 2007 rollout. The promptness and diligence with which you helped us track down and solve our issues has been fantastic."

SIMPLY CREATE A TABLE OF AUTHORITIES

Using a patented method that recognizes citation patterns, CitationWare® automatically codes each citation and generates a Table of Authorities with the click of a button, taking minutes, not hours. CitationWare® is designed to create a Table of Authorities for all 50 states. Our product is also designed to incorporate specialty courts, such as: Federal Circuit, FERC, U.S. Bankruptcy, U.S. Dept. of Labor (ARB), U.S. International Trade Commission, and the U.S. Supreme courts.

CITEASSISTANT DIALOG OPTIONS

Use CiteAssistant to review and edit citations before generating the final Table of Authorities. Also create a shareable printed report of citations, for easy review and correction by attorney.

IDENTIFY POTENTIAL CITATION ISSUES

Legal writers can generate Tables of Authorities that help to identify duplicate, incorrect, or incomplete citations.

COMPATIBILITY WITH FIRMS WITHOUT CITATIONWARE®

Briefs processed using CitationWare® use native Microsoft® Word field codes. This means briefs sent to outside law firms without CitationWare® will still be correctly displayed.

FORMATTING & OTHER CONTROLS

Advanced features and options (such as section break control, highlight citations, editable citations, and the ability to create a Table of Authorities within a specified section brief) are available to allow proper formatting and management of citations.

CITEASSISTANT DIALOG

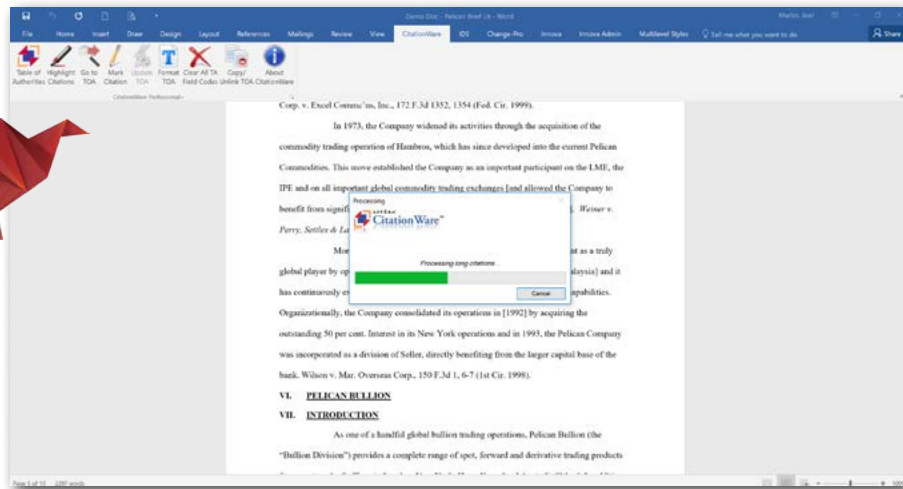

Advanced feature allowing user to double-check all citations found and make edits where required.

PROFILE PREFERENCES

CitationWare® is designed to suit attorney, firm or client preferences with the ability to store unlimited, reusable profiles. Profiles may be stored locally, and a network location for sharing with others.

EASY CREATION OF A STATEMENT OF POINTS & AUTHORITIES

For ease-of-use, default options for combining the Table of Contents and Table of Authorities are automatically detected based on State selection.

SYSTEM REQUIREMENTS

- Windows 7, 8 and 10
