Leverage AI for Contract and Document Analysis

Kira automatically extracts concepts and data points of interest from contracts and other documents with unparalleled accuracy and efficiency. Using patented machine learning technology, Kira is augmented by our in-house subject matter experts, adding intelligence and visualization capabilities to further enhance the accuracy and efficiency of contract and document review processes.

Why Kira?

Streamline contract review processes and analyze more documents, enhance client services, and attract new business, by leveraging Kira to easily extract insights from contracts and other documents. With Kira, the feasibility of reviewing more contracts and documents rather than a subset or sample, is a reality that can significantly reduce the legal risk in a contemplated transaction.

Accuracy

Our team of highly experienced lawyers, accountants, and subject matter experts train Kira to automatically find clauses and data points of interest with greater accuracy and in a fraction of the time that it traditionally takes.

Security

Kira is SOC2 Type II compliant, meeting the stringent requirements set forth by the AICPA and CICA. Stringent and effective operations controls and processes for the security, availability and confidentiality of customer services and systems is a top priority.

24/7 Support

Kira's support team are more than happy to help resolve any issues and provide guidance. Additionally, the Kira Support Portal provides users with access to an extensive repository of service articles, on topics ranging from basic how-tos to advanced configuration information.

Ken Heaps
Chief Information Officer,
Latham & Watkins LLP

" Our firm employs technologies delivered by market leaders such as Kira to help us meet client demands for cutting-edge legal analysis and advice in the most efficient manner possible, while also maintaining a consistently high standard of client service and collaboration."

Key Features

☑ Start Projects Immediately

Teams can use Kira to instantly start analyzing contracts and other documents with confidence without waiting for installation or other time-consuming processes. Kira is available in the cloud or on-premises.

☑ Quick Study

Easily create custom smart fields in any Latin-script language, so Kira can instantly and accurately identify any desired provisions, clauses, data points, and answers to any specific questions you have.

☑ Built-in Intelligence

Trained by experienced lawyers, accountants, and subject matter experts, Kira's out-of-the-box machine learning models extract and interpret over 1,300 common provisions, clauses, and data points, and contextualizes this information to provide users with the capability to implement data-driven decision-making.
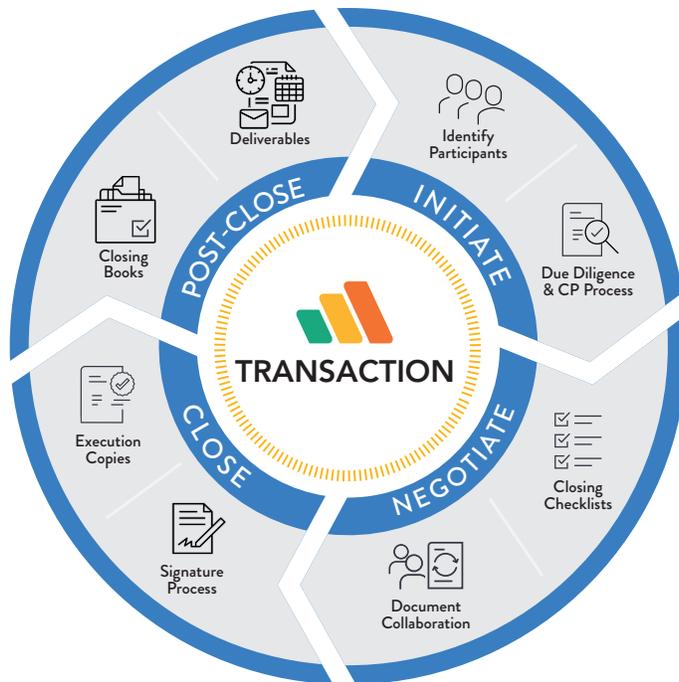

☑ Workflow Management

Kira's online centralized platform has data visualization tools that enable users to instantly track progress and view details of aggregated data, such as relative frequency or relationships between critical provisions, clauses, and data points.

☑ Smart Field Sharing

Custom smart fields trained by Kira users can be shared inside an organization or with different organizations, quickly and securely.

Kira is part of the Litera Transaction platform. Our software empowers lawyers from first drafts to final delivery and simplifies the way the legal profession leverages technology.
