

Reduce unbillable hours caused by Microsoft Word issues

DocXtools Companion is a repair toolkit that empowers lawyers to resolve the most common document issues with a click of a button, taking cleanup tasks from hours to minutes.

Why DocXtools Companion?

Microsoft Word doesn't fully meet the unique needs of the legal industry, and lawyers are naturally not Word experts. Together with tight client deadlines, reduced staffing resources, and complexities associated with reusing old documents, it can be difficult to turn documents around quickly without issuing write-offs.

Improve Productivity

Resolve Microsoft Word issues with one click, with software that is easy to install, learn, and start using immediately.

Ensure Quality

Spend your time crafting legal language and producing consistent, quality documents instead of struggling with formatting.

Increase Profitability

Empower your lawyers to fix their own documents quickly and effectively, reducing reliance on Word experts and support staff.

Karen Norman
IT Director
Downs Rachlin Martin PLLC

"DocXtools Companion allows us to do more and be more efficient, but it also empowers us to deliver a higher level of work and to give our clients a higher level of service."

Key Features

Numbering

Copying and pasting, multiple authors, and formats are a few ways numbering can become a challenge—fix any issue with a single click.

Table of Contents

Whether the TOC is missing, inaccurate, or not functioning, DocXtools Companion will create or repair it.

Cross-References

Microsoft Word's cross-reference functionality can be challenging—duplicated instances of the word section and broken cross-references are just a few errors you can correct instantly.

Conversion Cleanup

Fix issues that arise when converting Word to PDF, such as page numbers, section breaks, paragraph spacing, tables, and more.
