

FIND AND ACCESS YOUR BEST CONTENT, FASTER.

Lawyers must quickly leverage the best content in their document, and then deliver it to those who matter. But they often store their favorite clauses in a multitude of places which can make it difficult not only to locate, but standardize and share language for the entire firm, too.

Kira Systems and Litera Microsystems partnered to combine the power of Kira to automatically identify and extract information from contracts into the Clause Companion library, enabling users to quickly retrieve and re-use trusted content when drafting their documents, without any interruptions in their workflow.

MAXIMIZE ROI

Leverage the integration between Clause Companion and Kira to extend the benefits from your tech investments beyond their initial use case.

INCREASE OPERATIONAL EFFICIENCY

Automatically populate the Clause Companion clause bank with trusted and relevant content from Kira.

ENHANCE USER EXPERIENCE

Eliminate distractions with a seamless way to access information hosted within Kira and Clause Companion library favorites and insert them into a working document.
