

## Access, review, and collaborate on files from any device.

Litera Collaborate provides secure file sharing from all devices and browsers with comparison, metadata removal, and end-to-end encryption.

## Why Litera Collaborate?

Litera Collaborate combines the power of a secure file-sharing platform with our best-in-class document cleaning and comparison tools to enhance collaboration between lawyers and others without necessarily mailing files. Users can securely send encrypted emails and attachments, and transfer large files directly from Microsoft Outlook, or the Litera Collaborate web portal using any internet capable device.

### Flexibility

Share files and folders with co-workers and clients quickly and easy.

### Secure

Control access with passwords, expiry dates, upload capability, email notifications and more.

### No Limits

Unlimited file transfer with end-end encryption and full audit trail.

## Key Features

### Centralized user account management

Provides control and visibility over the system without dictating how users organize and manage files and projects, ensuring the correct users and permissions are set up for a group.

### Mobile accessibility

Access & share your files on internet capable devices, leveraging the policies and rendering sets set up for your firm.

### Full Audit Trail

Audit trail with time-stamping, proof of access (not just delivery to a domain), and open notification.

### Enhanced Security

Invokes the most secure encryption technology on the market, encrypting entire e-mail and/or attachments and keeping them encrypted even after downloading to a local file store.

### Easy-to-use interface

The "Secure All Attachments" button in Microsoft Outlook allows users to send securely with a single click, in a familiar email environment.

### Large File Transfer

With no limit on the size of files that can be securely transferred, Litera Collaborate supports most complex business processes.

Litera Collaborate is part of the Literra Drafting solution. Our software empowers lawyers from first drafts to final delivery and simplifies the way the legal profession leverages technology.
