

BECAUSE INTEGRITY MATTERS

Analyze, repair, restyle, and compare with ease.

With a robust set of tools to help you repair and style your documents, DocXtools™ greatly increases document quality and cuts review time in half. This helps legal teams meet client demands, improve collaboration, and produce high-quality documents.

Over 75 percent of AM Law 250 and more than 50 international law firms use DocXtools to streamline document production.

ANALYSIS

Analyze your document to discover problem areas.

CLEANUP AND REPAIR

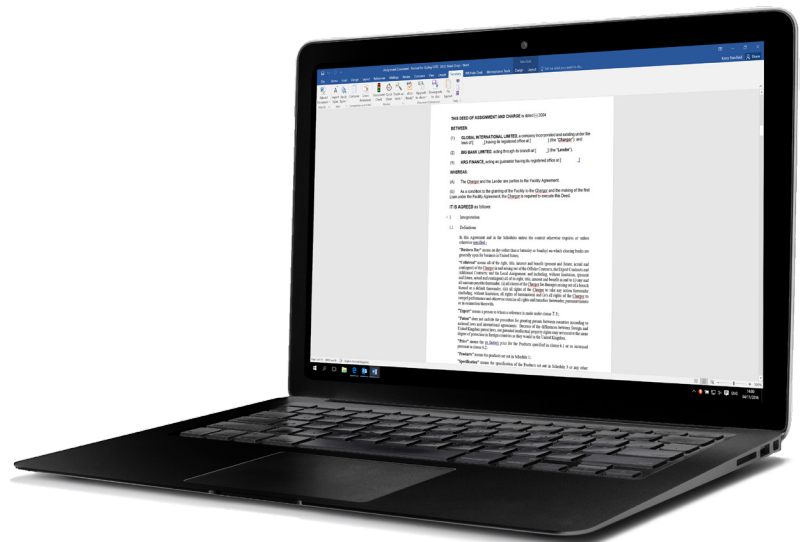

Quickly fix document instabilities with tools ranging from Quick Clean to Rebuild Document.

STYLE

Apply comprehensive style and branding to any document with one click.

COMPARE AND CROSS-REFERENCE

Enhance the compare functionality built into Microsoft Word, or utilize integration with Change-Pro® to compare every element within a document.

“Our document workflows are now better aligned with the needs of our clients. DocXtools, along with the support of the [Litera] Microsystems team, has allowed us to strategically prepare ourselves to move our technology ahead and provide a world-class legal work product to our clients.”

Paul Greenwood
Chief Information Officer
Clifford Chance

Start faster – A Litera Microsystems deployment team is available to configure the software for rapid implementation.

Get help when you need it – Litera Microsystems Customer Support provides ongoing support and expert assistance when you need it most.

Depend on our built-in back-up plan – For your most urgent document issues, send the file to DocER™ to analyze and remedy.

ENSURE QUALITY

- Convert non-native files (scanned, PDF) to ready-to-edit Word documents.
- Confirm or update documents to conform to house style with one click.
- Fix any issue that makes documents unstable—numbering, cross-references, table of contents, and more.

IMPROVE PRODUCTIVITY

- Improve throughput and turnaround times of support staff by over 150 percent.
- Enable lawyers to proactively find problems that interrupt the drafting process.
- Make native Word Compare usable for lawyers, including DMS integration.

INCREASE PROFITABILITY

- Reduce spend on document support hours by saving time on cleaning and reformatting documents.
- Eliminate the need for and cost of third-party comparison tools.
- Extend your capabilities with our DocER™ service.

Facts

- Over 75% of the AM Law 250 have DocXtools
- Reduces average time to repair a document by 70%
- 98% of customers who have chosen Litera Microsystems continue to use our products today

Minimum

System Requirements

- Windows 7 or later (32- or 64-bit)
- Office 2010 or later (32- or 64-bit)
