

BECAUSE PDFs MATTER, TOO.

Better, affordable PDF management.

From document creation, to the check and review process, and collaboration between colleagues, Foxit and Litera Microsystems partnered to further support the document lifecycle with PhantomPDF *Business*. PhantomPDF *Business* enables you to view, create, convert, edit, collaborate, OCR, protect, and sign your PDF documents securely within your existing workflow.

CREATE & UPDATE

Create PDFs from virtually any file format. As information changes, easily author updates to text, images, and layout. Include stamps, watermarks, headers and footers, and use Bates numbering.

ASSEMBLE & ORGANIZE

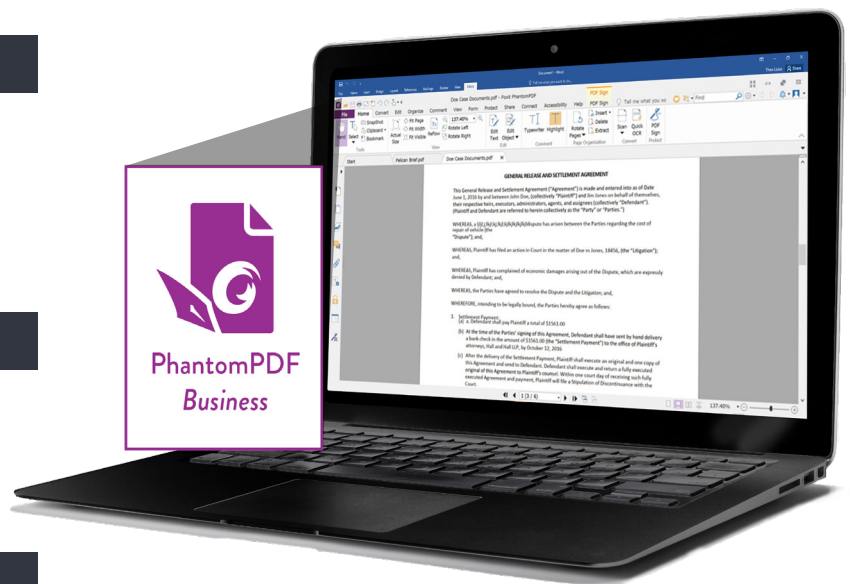

Quickly and easily organize and manipulate your PDFs. Merge or split documents, drag and drop pages, and crop, delete, flatten, and rotate pages.

COLLABORATE & SHARE

Increase flexibility and results as you mark annotations and share changes with others. PhantomPDF *Business* integrates with Content Management Systems to support your workflow.

CONTROL & MAINTAIN SECURITY

Manage passwords and encryption, and permanently redact PDFs. Secure PDFs by restricting the following: printing, copying and pasting (both text and graphics), adding and removing pages, and commenting.

PhantomPDF *Business* integrates within your existing workflow:

- iManage
- NetDocuments
- OpenText
- Worldox
- SharePoint
- Microsoft Office
- Dropbox
- Box
- Other leading cloud storage providers
