

BECAUSE STANDARDS MATTER

Store and use the best clauses. Faster.

Lawyers store their clauses in a multitude of places—email, local folders, old agreements. Clause Companion™ is a clause library that allows for easy storage, retrieval, and distribution of the highest quality content. Whether it comes from the firm's clauses, a personal drive, or integration with another source, users can easily access the best content from one location.

CLAUSE MANAGEMENT

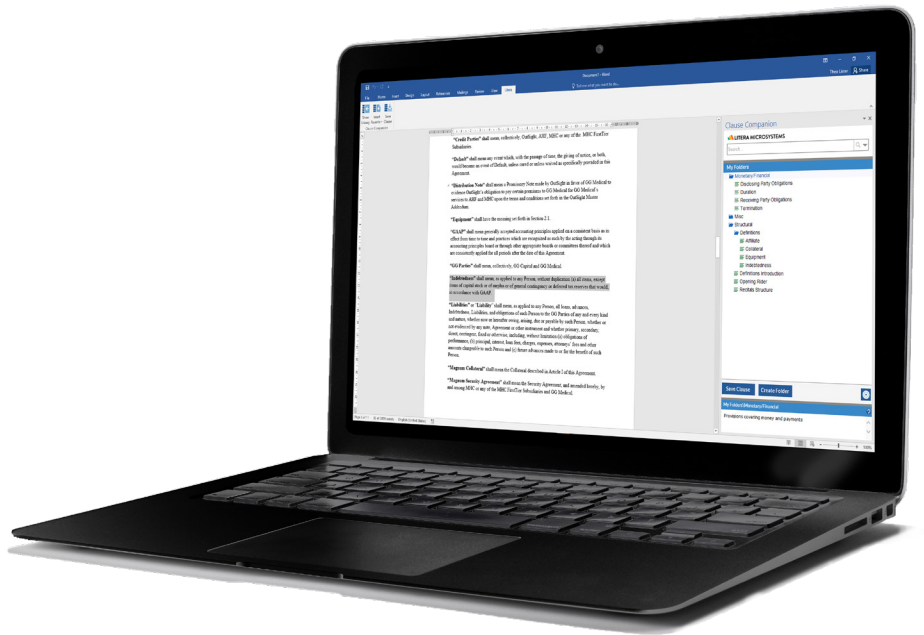

Easily store, retrieve, and insert correctly formatted clauses. Ensure the best content is available to be easily used again in future.

FIRM STANDARDS

Encourage the use of approved content and provide access to the firm's clause library, without the need to switch to another system.

SHARED CONTENT

Share selected clauses between users or across departments. Facilitate better internal collaboration from within Microsoft Word.

“It’s not the only one, but one benefit of Litera Microsystems solutions is that you effectively have a single ecosystem for anything you might need to do in the document’s lifecycle.”

Anthony Vigneron
Applications Director
Clifford Chance

For Lawyers: Speed & Convenience – Enable lawyers to access their preferred content faster, saving time and ensuring the best possible document.

For Knowledge Managers: Consistency – Provide contextual access to Knowledge Management approved content to help encourage lawyers to use it more consistently.

For IT: Technology-assisted Lawyers – Deliver value to the firm by investing in solutions that improve efficiency and complement the drafting workflow, driving adoption and client service.

CLIENT SERVICE

- Improve turnaround time by empowering your lawyers with solutions that fit within their workflow
