BECAUSE WINNING MATTERS.

Use Artificial Intelligence to deliver court-ready documents.

Litigators have a huge caseload: drafting briefs, dealing with discovery, taking and defending depositions, and managing the ever-changing submission requirements of different courts and judges. The last thing they want to spend time on is preparing, formatting, and fixing documents.

PREPARE LEGAL DOCUMENTS, FASTER.

Leveraging Natural Language Processing, a subset of Artificial Intelligence, Litigation Companion™ helps build, analyze, check, and repair documents automatically, allowing Litigators to focus more on what matters—winning for the client.

BUILD	ANALYZE	CHECK	REPAIR
Format content and citations, build and update a Table of Authorities, and fill in the blanks with a library of reusable information.	Find and summarize the issues Litigation Companion found in a consolidated dashboard.	Review defined terms, references, and citations to ensure validity, accuracy, consistency, and clarity.	Remedy mistakes such as unpaired quotation marks, spacing variations, inconsistent numbering, phrases, and case-specific information.

Built for Litigators, Litigation Companion leverages Artificial Intelligence to speed up the development of court-ready documents in one, simplified workflow in Word.

Increase Efficiency. Speed up document development and formatting, and identification and correction of errors by up to 90 percent.

Reduce Risk. Reduce liabilities for clients and your firm by identifying contact language errors, and assess the "legal health" of your documents with one click.

Gain Confidence. Know that references and citations are accurate, terms are defined, spelling is checked, tables and numbering are correct, and mistakes are fixed.

Empower the Workflow. Litigation Companion is part of the firm-wide Companion Suite, which includes Contract Companion®, Change-Pro® Premier, and DocXtools Companion®, which delivers a comprehensive efficiency gain for the firm.

Litigation Companion is compatible with:

- Windows 7 and later
- Office 2010 and later (32- and 64-bit)
- Office 365
- Microsoft Server 2008, 2012, 2018

" Not only does the efficiency of their time-saving technology have an impact on our financial performance, but it frees us from documents to focus on more strategic areas, like client relationships."
