

Deliver court-ready documents, faster.

Litigation Companion is a document review and Table of Authorities (TOA) creation solution that flags hard-to-find errors and builds a TOA in minutes—not hours—powered by the Best Authority engine trusted by over 90% of the AmLaw 100.

Why Litigation Companion?

Between investigating claims, building cases through fact development and legal research, and drafting pleadings and briefs, litigation teams have a huge caseload. They face pressure to make documents right and, to mitigate potential issues, often wait until the last minute to create a tedious TOA that takes hours in a stressful race against time.

Work Smarter

Let technology handle the review and TOA processes to eliminate stress at the 11th hour and allow the team to focus more on higher-priority work.

Improve Quality

Go beyond spellcheck with the ability to automatically catch then fix errors, confirm the accuracy of citation formats, and hyperlink citations to court-accessible legal research databases.

Reduce Risks

Implement last-minute changes quickly and accurately with searchable TOAs, helping the team meet deadlines and avoid re-work.

Steven Heller
 Director of Technology
 Graubard Miller

“Before, litigators would read through their document, highlight citations, and manually mark them. Now, Litigation Companion automatically detects and codes each citation and generates a TOA with a click of a button, helping litigators quickly and efficiently check their document and ensure consistent formatting.”

Key Features

TOAs powered by Best Authority

Automatically find and mark all citations in a brief and create an accurate, correctly sorted, and formatted TOA in minutes, not hours.

Document Review

Quickly check then fix all errors and logical inconsistencies with names, dates, and locations, and review color-coded citations in the TOA review pane.

Update TOAs with Review Mode

Edit TOAs directly in the preview panel and know that customizations are saved upon rescan. Search for specific citations or only what has changed.

Case Validation

Confirm the citations used are in court-approved formats and up to date with the Lexis Advance and Fastcase integrations.

HyperCase® Weblinks

Apply hyperlinks to case citations and references from a wide range of online research providers.

Integrations

- Microsoft Office
- Microsoft SharePoint
- iManage
- OpenText
- Worldox
- NetDocuments
- Google G Suite
- Lexis Advance
- Fastcase/Casemaker
- Casetext
